^{2.5)} The concept of the lecture (presence/virtual/ hybrid) is adequate for the current situation

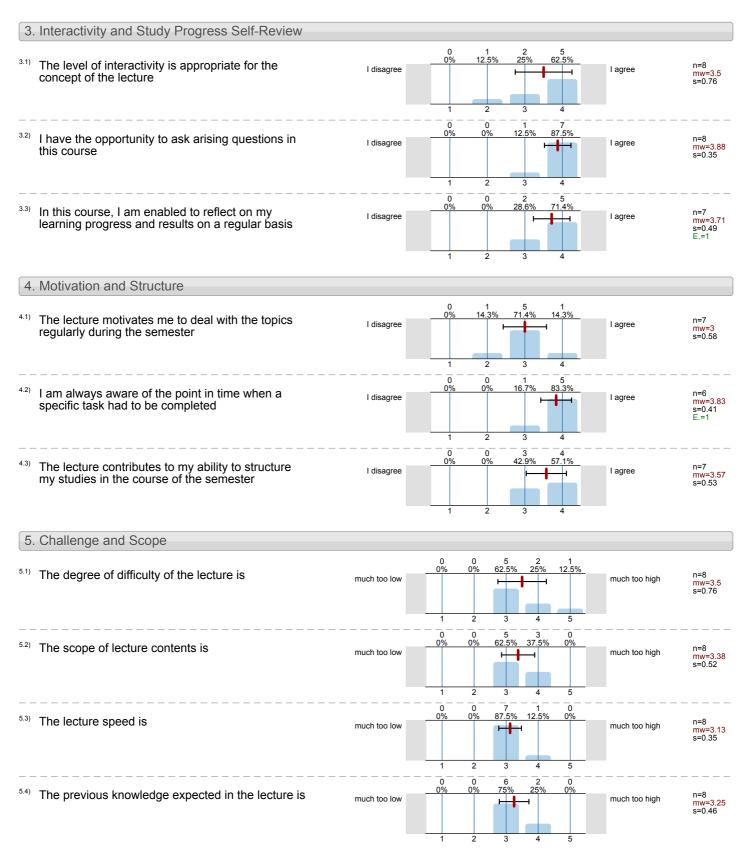

^{2.6)} Please explain your statement regarding the concept and the technical implementation:

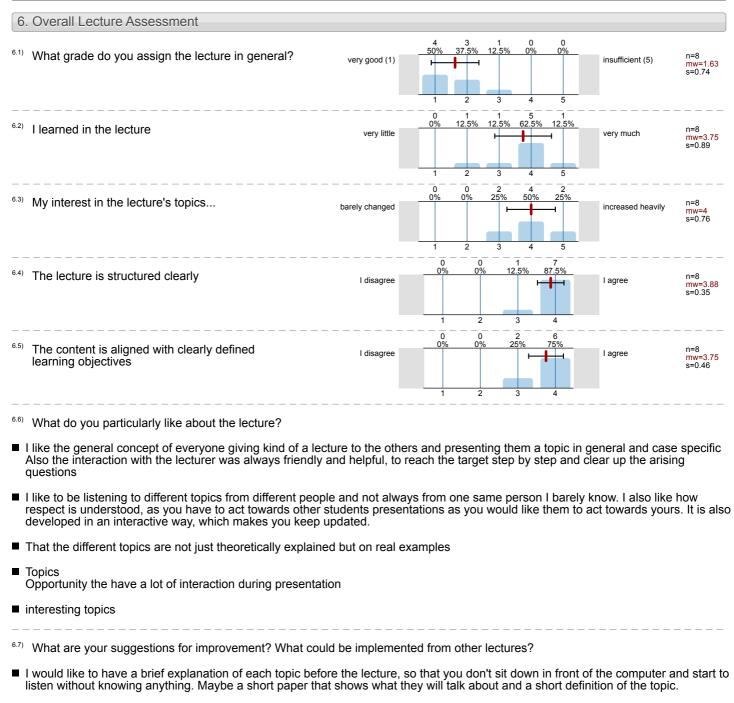

I disagree

n=8 mw=4 s=0

I agree

- Good concept of the whole seminar, especially the underlining of the importance of interaction contributed in interesting presentations, eventhough you couldn't listen in presence
- The learning tools are necessary and suite perfectly to the current situation. I can totally work with that. But I can not identify an additionally positive effect. All in all, it worked perfectly fine :)
- The situation is which it is, so there is not a lot to do. I would only mention that, from my point of view, it should be taken into account how difficult communication becames through this platforms. If makes it harder to develop a group work and it takes longer than what it would if we could meet in presence.

- It would be very helpful, if the provided literature files had clear titles, that reflect the name of the paper or something similar + the studon course could need a little update, making it more clear arranged
- no written part. Thats too much.
- presentations are a bit long, maybe two shorter presentations instead ?
- too little support from the lecturer; we have to learn everything ourselves; the students teach each other so they could also teach wrong things
